

Week 1 Resources

#	Resource	Link
1	Environment Setup	https://www.youtube.com/watch?v=ZVGutgqBMUM
2	C# Tutorial	https://www.youtube.com/watch?v=YrtFtdTTfv0

Week 1 Deliverables

- A verified, working .NET SDK development environment with a configured IDE.
- A console program demonstrating C# types, control flow, and nullable reference type handling.
- A small object-oriented domain model using classes, records, and at least one interface.
- LINQ queries and an async method demonstrated over a collection.
- A GitHub repository with a feature branch, clear commit history, and an opened pull request.
- A Week 1 summary document in Notion, ready for the mentor check-in.
