

Week 2 Resources

#	Resource	Link
1	C# Generics	C# Generics - What they are, why they are useful, and how to create them
2	LINQ Tutorial	Advanced C# – LINQ Tutorial
3	BEA	
4	sync/await	Master C# async/await with Concurrency Like a Senior
5	ASP.NET Core Web API	https://youtube.com/playlist?list=PLe9UEU4oeAuV7RtCbL76hca5ELO_IELk4&si=CuMAECzedGhExSjP
6	Dependency Injection	Dependency Injection(DI) Design Pattern - GeeksforGeeks

Week 2 Deliverables

- A generic repository class with appropriate constraints, committed to GitHub.
- LINQ exercises demonstrating grouping, joining, flattening, and deferred execution.
- An async/concurrency demo using Task.WhenAll and a cancellation token.
- A scaffolded ASP.NET Core Web API with at least 4 endpoints, built with both Controllers and Minimal APIs.
- Custom middleware and at least one DI-registered service injected into a controller.
- A Week 2 summary document in Notion, ready for the mentor check-in.
